

ENVASERV

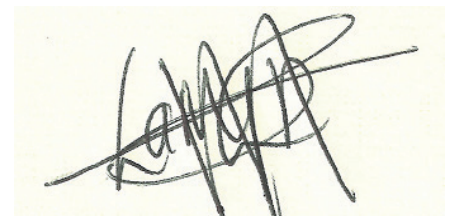

Quality Assurance Policy Statement

Envaserv Research Consult (ERC) considers environment, health and safety and quality as key business issues and these are factored into all our decision making, operational procedures and service delivery processes.

ERC Ltd. is firmly committed to professional services and a program of constant quality amelioration to ensuring the highest quality in all our environmental operations and services for accurate data and information generation. We comply with applicable quality standards and protocols in our quest to provide quality services to our numerous clients. Our procedures are adequately documented for data traceability perspective by all staff. Thus our quality systems provide staff with operational feedbacks to determine if the established quality and operational standards have been achieved.

Quality leadership is our utmost priority and every member of our staff strives and shares in the responsibility of realizing it. We hope meeting this goal will lead to continued satisfaction of our clients requiring accurate and reliable analytical data for cost-effective planning and decision making.

The policy has been communicated to all staff and its clients, and it is reviewed on regular basis.
