

ENVASERVU

Environmental Policy Statement

Envaserv Research Consult (ERC) considers environment, health & safety and quality as key business issues and these are factored into all our decision making, operational procedures and service delivery processes.

ERC is committed in minimizing the impacts on the environment and maximize positive environmental impacts. Thus the company aims at:

Assisting its clients to minimize waste, emissions and pollution through their operations.

Strive to meet or exceed all environmental legislation relating to our operations.

Use an accredited programs and procedures in all our environmental activities.

Regularly implementing a training program for our entire staff to raise awareness of environmental issues.

Minimizing wastage of energy and water in our operations and strive for environmentally safe and sustainable energy source in our operations.

Minimizing the risk to the Staff and the general public from operations and activities undertaken by the ERC.

Encouraging the adoption of similar principles by clients.

The policy has been communicated to all staff and its clients, and it is reviewed on regular basis.
